Archeological Excavation

The "[Xiongnu, Great Empire of the Steppes Mongolian Archeological Excavation Exhibition](#)" is the result of several years of excavation preformed by the Archaeology and History Department of the [National Museum of Korea](#).

The Huns' tombs in Duurlig Nars and Khentii Aimag in Mongolia yielded around 100 artifacts including jade disks.

The exhibition will offer an introduction to Tomb No. 1, a gigantic tomb with a length of 54m, accompanied by attached tombs that were excavated in 2009, 2010 and 2011.

The exhibition will be held from April 30 to June 19th 2013 at the [National Museum of Korea](#).

[See images of the tombs and artifacts here.](#)
