Training for Music Professionals - online resources

A series of online courses offering **Training and Lifelong Learning for Music Professionals** were developed under the EU funded STAMP project. Webinars, online toolboxes and many other learning resources are available free.

The project STAMP was created to be an advocate for the benefits of cooperation and networking in the music sector, mainly targeting Central, Eastern and South-East Europe. The project aims to develop exemplary tools for ongoing professional trainings such as workshop models, online learning tools or guidelines for mentors and trainers; these tools are free to use or to develop further.

Central, Eastern and South-Eastern Europe (CESEE) are musically rich regions with long-standing music traditions and innovative approaches. Highly qualified musicians and music professionals offer a wide range of musical activities and music organisations in this region are active in a broad range of disciplines.

At the same time, a lack of know-how in effective networking and fruitful international cooperation has often been expressed; even the benefits of networking do not seem to be recognised by all. To fill this gap the European Music Council has launched the STAMP project, funded by the Erasmus+ programme of the European Union.

This is why we created the following 5 trainings:

► Online Course on Entrepreneurship in Music

11 webinars address a variety of topics relevant to music professionals in the 21st century. Also we have produced guidelines on how to hold a webinar yourself.

► Training Model for Festival and Event Management

Create a win-win situation for your volunteers and your festival. Learn what a Young Event Management Programme (YEMP) is and how to implement it to your festival or event.

► Training on Audience Development

In an ever-changing world we have to adapt constantly our communication strategy. This online handbook will help you to get an update of the current communication channels available and how to increase your audience for your events.

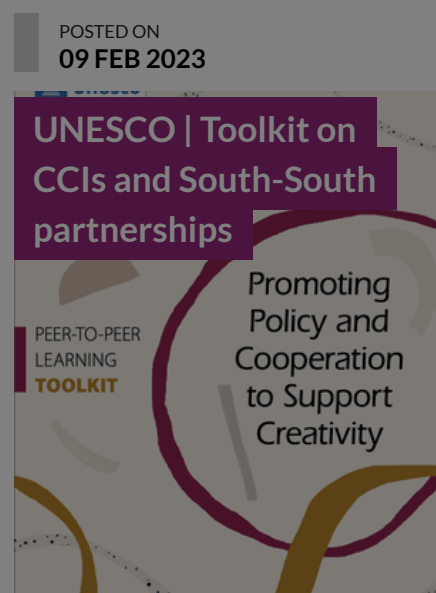

► Handbook on Social Inclusion for Disadvantaged Youth

Music can be a powerful tool to work with disadvantaged youth, get inspired and learn how to implement a multicultural approach within your music lessons. Disabilities can be evolved into strengths!

► Training on International Cooperation & Networking

Want to start your international cooperation project? Are you facing problems and want to find solutions to it? Our Online Course will guide you step by step!
