CALL FOR CONTRIBUTIONS

The leading question of the 2011 symposium is **how innovative artistic animation of public spaces can contribute to building more sustainable cities**. Community sustainability is viewed as encompassing and intertwining environmental, cultural, social, and economic sustainability and resiliency. The forum will explore and advance arts-based approaches to sustainable city building, public engagement, and animation of public space by bringing together interdisciplinary researchers, students, and practitioners to share experiences and insights.

Among the discussion themes are:

- Animation of public space through artistic practices
- Sustainable use of public space
- Urban-nature interactions
- Community change, public engagement, and social sustainability
- Community transitions and sustainabilities
- Heritage and memory in the context of cultural sustainability
- Creativity and innovation for sustainability
- Sustainability and creative education

In the framework of the symposium there will be a special presentation and event with artists involved in Coimbra's 1976 "Week of art in the streets" and special art commissions organized by Círculo de Artes Plásticas de Coimbra (CAPC), a Centre for Contemporary Art.

The symposium topics will be also explored in two artistic **workshops (Friday, 30th of September 2011)**:
