European Audiovisual Observatory

Set up in December 1992, the European Audiovisual Observatory is the only centre of its kind to gather and circulate information on the audiovisual industry in Europe. The Observatory is a European public service body with 37 member States and the European Union, represented by the European Commission. It owes its origins to Audiovisual Eureka and operates within the legal framework of the Council of Europe. It works alongside a number of partner organisations, professional organisations from within the industry and a wide network of correspondents.
