German Ministry of Education, Science and Culture

The Ministry of Education, Science and Culture has the task to create favorable conditions for the formation, the acquisition of knowledge and lifelong learning, teaching and research to raise at an excellent level, to intensify the exchange between science and industry and to promote the culture and strengthen. The Minister of Education, Science and Culture is responsible for matters of education, research and culture.

The division of the Ministry of Education, Science and Culture also includes the State Office for Political Education Mecklenburg-Vorpommern and the Land Commissioner for the Records of the State Security Service of the former GDR.

Themes:

- Early childhood education
- Inclusion
- School
- Vocational training

Lifelong learning from the very beginning: girls and boys have a right to individual support to develop the best possible way. The holistic concept of education for 0- to 10-year-old children, the country has created the framework. The aim is to improve the quality of education in day-care centers and in family day care. The day promotion in Mecklenburg-Vorpommern incorporates the latest findings of relevant research.

The provincial government is committed to the UN CRPD. In Mecklenburg-Vorpommern will be as possible taught at schools of general education perspective as many children. The inclusion provides the schools with major challenges. The regional government will develop a coherent overall concept on "Inclusion in schools in Mecklenburg-Vorpommern 2020". An expert committee has developed proposals for a long-term concept of how the schooling of children can be gradually implemented in mainstream schools with fewer opportunities.

Many roads lead to Rome: The school system in Mecklenburg-Vorpommern offers diverse pathways and delivery, so that the pupils achieve the best possible conclusion. The training courses are designed permeable and capable of connection. The school system in Mecklenburg-Western Pomerania is composed of two elements. After primary school, and the two-year orientation stage the decision for further school career from Year 7. Especially gifted children falls can visit for example already more of a music or sports high school.

- Vocational training
The vocational schools include various types of schools. Young people can prepare for a career, learn a trade, or take advantage of the opportunity to acquire school qualifications as the Berufsreifeprüfung or a high school. The vocational school teaches in more than 140 occupations. It conveys a partner of a training operation in addition to a basic vocational and technical education an extended general education. With this form of dual vocational training Germany is recognized by international standards. Because of demographic change to Sustainable vocational schools should develop into regional vocational training centres.

- **Adult education**

What Johnny Klein can not teach new tricks - such grandmotherly wisdom are long outdated. An ever-changing society demands from individuals rather Lifelong Learning. It begins in kindergarten and continues through school education and studies well into the occupation continues. This requires the broadest possible access to learning opportunities. Here, the community colleges play an important role

- **Political Education**

Democracy can only be kept alive if the citizens have a basic understanding of the policy environment, structures and decision-making in a democracy. You must be able to make their own and reasoned judgment on political issues. This is also a prerequisite in order to actively participate in the political process can. Civic education makes this an important contribution, because no one is born a democrat.

- **Academy and Studying**

Cutting-edge laboratories in ancient buildings, attractive courses, short training periods: Mecklenburg-Vorpommern is a popular location to study. The two universities in Greifswald and Rostock are among the longest in Northern Europe. Newer devices, such as the Academy of Music and Theatre, and four state colleges to enrich the range of courses. The two student unions in Greifswald and Rostock provide students with student dormitories, cafeteria food and offer counseling. Talented graduates receive doctoral scholarships.

- **Science and Research**

Mecklenburg-Vorpommern distinguishes itself increasingly as a location for science and research. Young academics and renowned scientists work together. In addition to universities, there are a number of non-university research institutions, for example, a Max Planck Institute, and two institutes of the Fraunhofer-Gesellschaft. The research results and their exploitation contribute to protecting jobs and combating unemployment. Cutting-edge research is funded by the state.

- **Culture**

Mecklenburg-Vorpommern combines historic and natural diversity architecture, literature, music and art, theater, film and the Low German language. Protection, maintenance and promotion of culture are State task. Cultural projects can receive public funding. Excellent work is funded by grants and the Culture Prize of the State of Mecklenburg-Vorpommern and rewarded. The State Office for Culture and Monument Preservation and the State Museum Schwerin there are also two operated by the state cultural institutions.

- **Promotions**
Many projects in culture, science and research to get government support. This means that the training does not come to a question of money, students receive BAföG under certain circumstances and education loans. In addition, doctoral scholarships are awarded. Recently, the promotion of memorial trips is possible. Teenagers get so an intensive examination of its own history, as it is hardly possible otherwise.
