Red Led

Red Led works on top spanish and international production projects. The recording studio is focused on recording, mixing or/and mastering all type of music production, except the symphonic one. Apart from the 40 m2 control room, it is included a 80 m2 general use area with an hyperarmonic piano room, a 15 m2 mid-dead room, a dead room, and a 25 m2 live room. All rooms have got a good visual communication, and own silent microphonic lines as well as a customizable foldback system.

Despite the high level of complexity of the studio equipment, the technical infrastructure, human and material, makes easy the work of any free-lance engineer who might handle a project. A fluent operation is guaranteed by the permanent assistance of three highly qualified sound engineers with a large experience in our studio. Besides, Red Led has its own complete service of full technical maintenance.
